**Directions:** In order to price out your fixtures we need all relevant information filled in. Be careful to write the correct model number. Specify the finish or at least the price level of the finish. Overall height must be specified on all ceiling fixtures. Long lengths require an upcharge. We will deduct the shade height if applicable to figure out the fixture height. Specify your choice of shades. We will calculate the appropriate quantity of shades. See the *Terms and Conditions* page in the **Specification Guide** for more details. If you choose to have a pattern etched on the shades, indicate the pattern number in the last column. See the **Pattern Guide** for pattern numbers.
